OBJECTIVE

AIML Engineer fresher with hands-on experience in LLM fine-tuning, multi-agent AI systems, RAG pipelines, and computer vision deployment. Seeking a role at an AI-first company to contribute to production Gen AI and AI systems from day one.

TECHNICAL SKILLS

LLM & Gen AI: LLaMA 3.2, Gemini API, PEFT, QLoRA, BitsAndBytes, Prompt Engineering, Agentic AI
Computer Vision: OpenCV, MediaPipe, CNN, Real-time Inference
ML & NLP: Scikit-learn, NLTK, TF-IDF, Supervised Learning, Linear Regression, Classification
Deployment: Flask, Hugging Face Hub
Core: Python, Pandas, Matplotlib, Git

PROJECTS

- StockBot** | *Python, Agentic AI, Flask* 2026
- Built a multi-agent AI system where specialized agents collaboratively perform stock research, data retrieval, and analysis.
 - Designed agent orchestration pipeline with task delegation, inter-agent communication, and result synthesis.
 - Deployed via Flask interface enabling real-time stock research queries through a web UI.
- MedLLM** | *Python, LLaMA 3.2 3B, PEFT, QLoRA, Hugging Face, Flask* 2026
- Fine-tuned LLaMA 3.2 3B on medical Q&A data using QLoRA (4-bit quantization, LoRA R=8, A=16) on 4GB VRAM with gradient accumulation (steps=16).
 - Built full pipeline: data preparation → fine-tuning → LoRA adapter merging → Flask inference API.
 - Applied domain adaptation and prompt engineering to improve diagnostic response relevance on medical queries.
- SignTalkAI** | *Python, OpenCV, MediaPipe, CNN, Flask* 2026
- Built real-time sign language recognition system using CNN trained on hand gesture data via webcam input.
 - Pipeline covers hand detection, landmark extraction via MediaPipe, feature processing, and live classification.
 - Deployed via Flask web interface enabling browser-accessible real-time sign language predictions.
- Spam Email Classifier** | *Python, NLTK, Scikit-learn, Flask* 2026
- Built binary NLP classifier (Spam/Ham) with full preprocessing: tokenization, stopword removal, TF-IDF vectorization.
 - Trained and compared Naive Bayes and Logistic Regression; selected best model based on F1-score evaluation.
 - Deployed via Flask with real-time classification in browser.
- Student Marks Predictor** | *Python, Pandas, Scikit-learn, Matplotlib* 2026
- End-to-end supervised learning pipeline: data wrangling, feature selection, train-test split, Linear Regression training.
 - Visualized predictions vs actuals using Matplotlib to validate model performance.

EXPERIENCE

- Independent AI/ML Developer** 2025 – Present
Self-Directed
- Independently built and deployed 5 end-to-end AI systems spanning LLM fine-tuning, multi-agent AI, computer vision, and NLP.
 - Gained practical depth in Hugging Face ecosystem: model training, PEFT fine-tuning pipelines, and model hosting.
 - Developed proficiency in agentic AI architectures, Flask API development, and inference optimization.

EDUCATION

- Diploma in Artificial Intelligence & Machine Learning** 2026
Sheth Shri Otarmal Sheshmal Parmar College of Diploma Engineering, Maharashtra MSBTE | 77.59%
HSC (12th Standard) 2022
Mumbai University 59.23%

ACHIEVEMENTS

- Fine-tuned LLaMA 3.2 3B for medical diagnostics using PEFT/QLoRA on consumer 4GB VRAM hardware.
- Built a multi-agent stock research system demonstrating agentic AI orchestration end-to-end.
- Independently designed and deployed 5 AI applications covering Gen AI, computer vision, and NLP.
